TEAMWORK
IS THE KEY TO
SUCCESS.**

„Tap into the growing global demand for sawn timber products and unlock new possibilities for your business with our expertise.

We are here for you.“

– *Valentina Wolfrum, Head of Export*

„Maintaining contact is important, keeping up with the latest updates and information. We are offering excellent rettenmeier® customer service with the best possible experience, making sure our customers are content.“

– *Lisa Glauber, Backoffice Export*

„We are working hard to deliver the goods in the shortest possible time.“

– *Karsten Sachse, Truck Driver*

„We offer custom packaging with labels, tags and barcodes applied to the side or front of a unit upon request.“

– *Philipp Mohr, Shift Supervisor Planer Line*

„By leveraging our ample storage capacities, railway access at all our plants, and our modern fleet, we can supply with maximum flexibility and reliability. Furthermore, we have forged strong relationships with shipping companies to guarantee the cargo is delivered to any destination.“

– *Manuel Heide, Head of Logistics / Transport Manager*

OPTIMIZED CUTTING – THE BEST OUT OF A SINGLE LOG

Our sawing line cuts the centre products along with sideboards in one run.

The 3D-scanning process allows for the most efficient use of each log based on a cutting pattern, resulting in 100% value.

MORE ...**

CONSTANT QUALITY

Our equipment is extremely precise, allowing us to meet the exact dimensional tolerances that are required in the market.

We have a comprehensive quality management system in place, which includes visual sorting of the boards with advanced scanner technology and our skilled staff.

Our certifications ensure that our products meet all applicable standards and regulations for quality management.

You can find our IPPC certificate, strength graded sawntimber certificate (C16, C24, etc.), CE / UKCA certificate, and more on our homepage.

**LEARN
MORE ...**

EFFICIENT DRYING

In our drying facilities, the material is dried to the requested moisture content and inspected thorough subsequently to meet the required quality at the end.

Our advanced channel dryers allow us to feed the sawn timber in any length and run a fully automated throughput process with maximum efficiency. **To top it off, we use only the heat from our biomass power plants for drying operation, making it an environmentally friendly solution.**

GLOBAL EXPORT SOLUTIONS – SIMPLIFIED

We handle every step of the export journey, ensuring your shipments transition effortlessly from initial inquiry to final delivery. With in-depth knowledge of trade regulations and customs protocols, we take care of all necessary documentation tailored to each destination. Our focus on precision and efficiency guarantees hassle-free port clearance, saving you time and allowing your goods to continue their journey forthwith.

EXCEPTIONAL SUPPORT AND EXPERT GUIDANCE

If challenges arise, we act swiftly and effectively to find the best solution. You can count on our dedication and unmatched commitment to excellence!

A GREENER WAY TO MOVE AROUND

The railway infrastructure guarantees that our sites have dependable and efficient connections. This not only **decreases our carbon footprint** by taking cargo off the roads, but it also enhances the effectiveness of our freight transportation.

ENGAGING IN CLIMATE CHANGE MITIGATION

1. The timber we use as a raw material absorbs the detrimental CO₂ from the atmosphere.
2. We transform the wood sustainably into CO₂ holders and thereby prolong the retention of the contained carbon. For instance, constructing a low-energy house of timber can reduce emissions by up to 80 tonnes of carbon dioxide.
3. Our rettenmeier® PREMIUM OF WOOD is a great alternative to materials such as steel or concrete, which produce large amounts of CO₂ during their manufacture. It is a more sustainable option that can help reduce emissions and conserve energy.

LEARN
MORE ...

WOOD – THE SUSTAINABLE RESOURCE OF TOMORROW

As experts in timber, we embrace our responsibility to combat global warming. Aligned with the “Holz rettet Klima” / “Wood Saves the Climate” initiative, we aim to educate and inspire action. Together we advocate for the responsible and innovative use of timber – a remarkable and renewable natural resource, to protect our planet and ensure a sustainable future.

WE REDUCE EMISSIONS

Through active participation in the timber sector’s climate protection initiative, we are dedicated to achieving sustainable emissions reduction. By adhering to the GHG Protocol, we regularly assess our CO2 footprint, allowing us to implement precise, long-term strategies that drive meaningful environmental progress.

ZERO WASTE STRATEGY

*→ 100% added value
+ 100% appreciation*

In keeping with our dedication to **rettenmeier®'s zero waste policy**, we make sure to use all our wood residuals in a sustainable manner. This guarantees that our lumber resources are used to their fullest extent and are 100% utilised.

**LEARN
MORE ...**

PRESERVING OUR FORESTS FOR FUTURE GENERATIONS

The continued existence of our domestic forests is of paramount importance to us. Not only do they provide us with raw material, but they also serve as a habitat and recreational area for plants and animals. **Consequently, it is essential to practice sustainable forestry and safeguard the vitality and vigor of the forest ecosystem.**
